1 Python for Numerical Analysis 101

1.1 Homework

1.1.1 Instructor: Evelyn J. Boettcher, DiDacTex, LLC

1.2 Week 2 Lesson 4

Go to www.data.gov or any a data source of your choice.

- download a dataset, and examine that data.
- Do this for a json file and a csv file.

Example: * Find the mean, median mode of a data attribution or * Plot the data

My go to is pandas to read in new data. But, you can use any package(s) that you like.
